PROFESSIONAL SUMMARY

Data Analyst with 9 months of professional experience at IQVIA in data analysis, MIS reporting, data validation, quality checks, and operational analytics. Proficient in Python (Pandas, NumPy), Advanced Microsoft Excel, VBA, Power BI, Tableau, and SQL, with hands-on experience in exploratory data analysis, data profiling, trend and anomaly analysis, KPI reporting, dashboard development, and reporting workflow optimization. Experienced in transforming complex datasets into actionable insights, reconciling data discrepancies, and collaborating with cross-functional stakeholders to deliver accurate and timely analytical outputs. Currently pursuing an MCA from IIT Patna (CGPA: 8.4/10).

TECHNICAL SKILLS

- **Python & Analytics:** Python, Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Profiling, Statistical Analysis & Exploration, Trend Analysis, Anomaly Detection, Root Cause Analysis
- **Excel & Automation:** Advanced Microsoft Excel, Pivot Tables, XLOOKUP, INDEX-MATCH, Power Query, Data Validation, VBA/Macros, Reporting Automation
- **Business Intelligence:** Power BI, DAX, Power Query, Data Modeling, KPI Dashboards, Interactive Reporting, Tableau, SAP Analytics Cloud (SAC), Looker Studio, Metabase
- **SQL & Databases:** SQL, MySQL, Google BigQuery, Joins, CTEs, Window Functions, Subqueries, Aggregations, Data Profiling
- **Data Quality & Business Analysis:** Data Validation, Data Reconciliation, Data Quality Checks, KPI Reporting, Business Analysis, What-If Analysis, Process Improvement
- **Tools & Big Data:** Git, GitHub, Apache Spark, Apache Hadoop, Automated Data Pipelines, Process Digitalization, Microsoft Office, Google Sheets

PROFESSIONAL EXPERIENCE

IQVIA | Senior Production Associate | Bangalore | Jul 2025 – Mar 2026

- Analyzed, cleaned, validated, and reconciled operational datasets to prepare daily, weekly, monthly, and ad-hoc MIS reports using Advanced Microsoft Excel, ensuring accurate and consistent business reporting.
- Developed and maintained Excel VBA macros to automate repetitive reporting and data-processing tasks, improving workflow efficiency and reducing manual effort.
- Used Pivot Tables, XLOOKUP, INDEX-MATCH, Power Query, and VBA-driven workflows to consolidate, validate, transform, and analyze data from multiple sources.
- Performed data quality checks, reconciliation, exploratory analysis, trend analysis, and anomaly identification to ensure accurate and reliable reporting outputs.
- Investigated data discrepancies and recurring operational issues, performing root cause analysis and supporting timely resolution.
- Collaborated with cross-functional stakeholders to gather reporting requirements, resolve data issues, and translate business operational needs into structured data workflows.

SELECTED PROJECTS

AI-Powered Customer Intelligence & Churn Prediction | SQL, Python, Scikit-learn, Power BI, Tableau, GenAI

[View Project](#)

- Analyzed 20,000+ customer records using SQL and Python to identify customer behavior, retention patterns, churn drivers, and segment-level trends.
- Implemented classification-based churn prediction with behavioral feature engineering to identify customers with elevated churn risk.
- Built interactive Power BI dashboards with DAX KPIs, dynamic filters, customer segments, and retention views for business analysis.
- Applied GenAI to summarize model outputs and convert analytical findings into data-backed customer retention recommendations.

AI-Driven E-Commerce Demand Forecasting & Inventory Optimization | Python, SQL, Time Series, Machine Learning, Power BI

[View Project](#)

- Built an end-to-end demand forecasting workflow on historical e-commerce transactions using Python, SQL, time-series analysis, and machine learning techniques.
- Engineered lag and rolling-window features and evaluated forecasting approaches using chronological validation and MAE/RMSE/WAPE metrics.
- Developed an inventory optimization framework covering demand variability, safety stock, reorder points, and stockout/overstock risk.
- Created BI views for demand trends, forecasts, product prioritization, and recommended inventory actions to support planning decisions.

AI Analytics Copilot with Local LLMs | n8n, Ollama, NocoDB, QuickChart, Docker, Python, SQL

[View Project](#)

- Developed a conversational analytics copilot that interprets natural-language business questions and returns structured data insights through an automated workflow.
- Integrated NocoDB as a structured data backend and n8n workflow components to retrieve and process business data based on user queries.
- Implemented dynamic QuickChart visualization generation to return charts and visual summaries directly from analytical responses.
- Automated the flow from query interpretation and data retrieval to analysis, visualization, and formatted business reporting using locally hosted components.

EDUCATION

- **Master of Computer Applications (MCA), IIT Patna (2025 – 2027) – CGPA: 8.4/10**
- **Bachelor of Computer Applications (BCA), Kristu Jayanti College, Bangalore (2022 – 2025) – CGPA: 7.9/10**

ACHIEVEMENTS

- 5 Star HackerRank in SQL and Python

CERTIFICATIONS

- SQL Advanced — HackerRank
- Data Analytics Essentials — Cisco
- Introduction to Data Analysis Using Python — Google
- Power BI for Beginners — Simplilearn (powered by Microsoft)
- Business Analytics with Excel — Simplilearn (powered by Microsoft)
